About EPMAPEX

EPMAPEX is a multidisciplinary engineering and project services company founded by professionals with over two decades of international experience across the Oil & Gas, Industrial, and Construction sectors.

We deliver high-value technical expertise, structured project oversight, efficient procurement solutions, and extensive quality control services tailored to the demands of complex projects. Our approach combines engineering discipline, transparent communication, and a commitment to delivering cost-effective, high-quality results.

Delivering Excellence in Oil & Gas, Industrial, and Construction Project Services

At a Glance

- **Wide Expertise**

20+ years of international project experience

- **Multidisciplinary Expertise**

Engineering, project management, procurement, and quality control capabilities under one roof.

- **Reliable Project Delivery**

Structured processes, clear communication, and practical solutions aligned with your objectives.

Focus on quality, cost, and schedule performance.

- **Flexible Support**

On-site and remote services that adapt to your project size, location, and timeline.

Delivering Excellence in Oil & Gas, Industrial, and Construction Project Services

Mission & Vision

Mission

To deliver innovative, efficient, and reliable engineering and project services that enable our clients to achieve safe, high-quality, and cost-effective project outcomes.

Vision

To be recognized as a trusted long-term partner known for engineering excellence, professional integrity, and the ability to support complex projects from concept to completion.

Delivering Excellence in Oil & Gas, Industrial, and Construction Project Services

What Sets Us Apart

Expertise That Delivers

Deep technical and managerial competence built on more than 20 years of project experience.

Cost-Effective Value

Optimized solutions, resources, and workflows to reduce cost without sacrificing quality.

Customer-Centric Focus

Flexible, responsive support aligned with your technical and commercial objectives.

Transparent Collaboration

Clear communication, honest reporting, and complete visibility into project progress.

Innovation & Improvement

Use of modern tools, digital workflows, and practical engineering methods.

Long-Term Partnership

Relationships based on reliability, consistency, and mutual success.

Delivering Excellence in Oil & Gas, Industrial, and Construction Project Services

Our Services

EPMAPEX delivers integrated technical and project services designed to support clients across the full project lifecycle.

- **Engineering Services**
- **Project Management & Coordination**
- **Procurement, Procurement Expediting & Supply Chain Management**
- **Quality Control Documentation & Reporting**
- **On-Site / Remote Planning & Project Controls**
- **On-Site / Remote Engineering & Technical Support**

Delivering Excellence in Oil & Gas, Industrial, and Construction Project Services

Engineering Services

We deliver multidisciplinary engineering expertise to support design, reviews, technical troubleshooting, optimization, calculations, and document preparation.

What we offer

- Specialized engineering expertise across multiple disciplines
- Technical troubleshooting and engineering support
- Design reviews, calculations, and optimization
- Prototyping and testing support
- Integration with client engineering teams
- Engineering document control and traceability

Benefits

- ✓ Faster problem resolution
- ✓ Better design quality and performance
- ✓ Improved efficiency and innovation
- ✓ Stronger team collaboration
- ✓ Reduced rework and engineering cost

Delivering Excellence in Oil & Gas, Industrial, and Construction Project Services

Project Management & Coordination

We provide structured project management to ensure safe, on-time, and on-budget execution.

What we offer

- Project coordination and interfaces management
- PMO (Project Management Office) organization and development
- Project planning and scheduling
- Budget and cost control
- Stakeholder communication and reporting
- Quality assurance integration
- Risk identification and mitigation
- Progress tracking and performance analysis
- Change Order and claim management

Benefits

- ✓ Efficient execution and resource use
- ✓ Reduced risk of rework and delays
- ✓ Clear visibility and decision support
- ✓ Reliable on-time delivery

Delivering Excellence in Oil & Gas, Industrial, and Construction Project Services

Procurement, Procurement Expediting & Supply Chain Management

We support clients in optimizing procurement operations and building efficient, resilient supply chains.

What we offer

- Strategic sourcing and supplier qualification
- Contract negotiation and commercial management
- Procurement expediting and order follow-up
- Supplier performance monitoring
- Procurement analytics and reporting
- Supply chain risk monitoring and mitigation

Benefits

- ✓ Improved supplier performance
- ✓ Reduced delays and disruptions
- ✓ Better contract terms and cost savings
- ✓ Full visibility across procurement cycles
- ✓ Reliable delivery and documentation compliance

Delivering Excellence in Oil & Gas, Industrial, and Construction Project Services

Quality Control Documentation & Reporting

Comprehensive QC documentation to ensure compliance, traceability, and performance transparency.

What we offer

- Material Test Certificate (MTC) review
- Inspection & Test Plans (ITPs)
- QC reports for all tests and inspections
- Quality procedure development
- Inspection coordination (client / 3rd-party)
- Audit trail and documentation management
- Compliance reporting

Benefits

- ✓ Strong quality assurance
- ✓ Clear documentation and traceability
- ✓ Faster issue detection and resolution
- ✓ Reduced rework and non-compliance risk

Delivering Excellence in Oil & Gas, Industrial, and Construction Project Services

On-Site / Remote Planning & Project Controls

We provide expert planning and project controls support through both on-site deployment and flexible remote collaboration.

What we offer

- Scheduling and forecasting
- Cost control and budget monitoring
- KPI tracking and performance dashboards
- Progress analysis and reporting
- Risk analysis and scenario planning
- Change Order and claim analysis

Benefits

- ✓ Accurate, timely project visibility
- ✓ Better cost and schedule control
- ✓ Data-driven decision making
- ✓ Early detection of risks and deviations

Delivering Excellence in Oil & Gas, Industrial, and Construction Project Services

On-Site / Remote Engineering & Technical Support

EPMAPEX strengthens project teams with specialized engineering support available on-site or remotely.

What we offer

- Technical troubleshooting
- Calculations and design review
- Document verification and checking
- Multidisciplinary engineering guidance
- Knowledge sharing and team support

Benefits

- ✓ Faster technical resolution
- ✓ Higher design accuracy
- ✓ Stronger team capability
- ✓ Seamless remote or on-site collabor
